Details of event equipment

This document provides details of all equipment made available by Bolton Council for use in delivering events.

Please note, in use of any of the equipment, you must consider the following:

Risk Assessments

As an event organiser you're required by law to protect your employees, and others, from harm.

The minimum you must do is:

- identify what could cause injury or illness at your event (hazards)
- decide how likely it is that someone could be harmed and how seriously (the risk)
- take action to eliminate the hazard or, if this isn't possible, control the risk

Assessing risk is just one part of the overall process used to control risks at your event.

Competent People

You must get help from a competent person to enable you to meet the requirements of health and safety law in use of the equipment.

A competent person is someone who has sufficient training and experience or knowledge and other qualities that allow them to assist you properly in using this equipment. The level of competence required will depend on the complexity of the situation and the help you need.

You may also need to consult health and safety representatives in good time on the arrangements for competent help.

Think particularly about the weight and size of the equipment you are using for your event and any technical support you may require on use of electrical equipment.
